Class: 26SU06 Understanding Story Structure (1 Session)

Storytelling is how humans learn. A story can help you survive, understand the big questions of life, and entertain yourself. When you read a novel, or watch a movie, the storyteller aims to take you out of the ordinary, hack your brain, and put you into a new reality. How do they do that? This class is for story lovers, as well as those who might be thinking of taking a pen in hand and writing a story. Attendees will learn about three act structures, character arcs, and character archetypes.

Class: 26SU08 Is the Sky Really Blue? Color, Culture, and Perception (2 Sessions)

Do people everywhere experience color in the same way, or do language and culture shape what we notice and how we group it? This course draws on anthropological research on color perception as a window into long-standing debates about the relationship between nature and culture. Examine examples from different societies, such as why some languages have no single word for what English speakers call blue, while others have several, and what these reveal about how humans organize knowledge and form categories. The second class will extend these insights to other forms of classification, exploring how ideas about color can inform our understanding of how humans craft boundaries and belong in other areas of life.

Dates/Time: Mon, Jun 15, 22, 10:00-11:30 AM

Location: NOVA CN 103

Class Size: Min. 10, Max. 50

Class: 26SU24 America's Policy Consensus Countering China's Challenges: Is It Softening? (1 Session)

The Trump and Biden administrations, with strong support from bipartisan majorities in Congress coalesced into what was called the "Washington Consensus" favoring an array of measures in an explicit "whole of government" effort to defend America and its interests from Beijing's negative actions. The second Trump administration hardened policies

toward China but also has been solicitous of Chinese support and anxious to achieve trade and other agreements with Chinese leaders. In the process, they have made compromises with China that have been criticized by Democrats and others as undermining American security. Commentators see this argument as fracturing the Washington Consensus on ending engagement and countering adverse Chinese challenges, making U.S. policy weak.
